Wright State University

CORRESPONDENCE CONCERNING THIS ARTICLE SHOULD BE ADDRESSED TO STEPHEN C. MCCONNELL, WRIGHT STATE UNIVERSITY, SCHOOL OF PROFESSIONAL PSYCHOLOGY, 9 N. EDWIN MOSES BLVD., DAYTON, OH 45402. PHONE NUMBER: (937) 775-4300, EMAIL: STEPHEN.MCCONNELL@WRIGHT.EDU

Overview

This Doctor of Psychology (Psy.D.) Program Guide is a quick reference for both prospective Psy.D. students and their professors or academic advisors. All Psy.D. programs are listed by location, administration, specialization, sub-specializations available, American Psychological Association accreditation status, program length, and dissertation/research project requirement.

Outline of Contents

Doctor of Psychology Programs Today – 2007 Edition: Location, Accreditation, Administration, Specialization

The Doctor of Psychology (Psy.D.) degree has been in existence in the United States since the late 1960s. The essential difference between Ph.D. and Psy.D. degrees is product. Ph.D. education traditionally emphasizes basic research and the production of original knowledge, in keeping with a scientist/academician model. On the other hand, Psy.D. education centers on the development of competencies of practice, reflecting a practitioner/professional model.

The American Psychological Association (APA) accredits doctoral programs in psychology. Programs listed as accredited have been judged by the APA to have met the criteria for accreditation. Accreditation is a voluntary process. The accreditation status listed for each program in this resource reflects the program's current status with regard to APA accreditation. It is noted that the APA only reviews and accredits programs that fall into the following categories: Clinical, counseling, school, or combined professional-scientific psychology. As such, programs with foci outside of these parameters are ineligible to apply for or to receive accreditation.

Argosy University, formerly American Schools of Professional Psychology (ASPP), is a national, freestanding (i.e., not university-related) proprietary, educational component of Argosy Corporation. Akin to a national franchise, Argosy University has campuses in Arizona, California, Florida, Georgia, Hawaii, Illinois, Minnesota, Virginia, and Washington, as shown in the tabular entries within this resource. Nine of the fifteen Argosy University Programs are APA accredited.

Currently there are 117 psychology programs that offer the Psy.D. degree (Figure 1). Eighty of the programs offer degrees in clinical, twelve in school, four in educational psychology, four in combined specialties (e.g., clinical and school psychology), four in counseling psychology, three in forensic psychology, two in marital and family therapy, three in organizational psychology, two in business psychology, one in spiritual and psychological health, one in psychoanalysis, and one in individual, organizational and community transformation (last three categories listed as 'other' in Figure 2). Fifty-six of the programs are university-affiliated and sixty-one are freestanding (Figure 3). Of the 117 Psy.D. programs, 70 have received APA accreditation (Figure 4). Among accredited programs half have received accreditation since 1995 (Figure 5). The 47 non-APA accredited programs consist of 11 university-affiliated programs and 36 freestanding professional school programs. Furthermore, of those programs that are non-APA accredited, 17 are such that they are ineligible for APA accreditation. It should be noted

that while a few programs are no longer active, there has been an increase in numbers by 26 programs since the 2004 review, representing more than a 22% increase.

This compilation will assist individuals, such as undergraduate psychology students, who wish to contemplate or seek an advanced degree. It also will be helpful to psychology faculty members who advise students about graduate school prospects and offer career guidance. This guide will serve as a ready access reference for inquiries and questions about the Psy.D. model of professional education in psychology.
