

## Best Practices: Course Calendars

Last updated: July, 2007

This document contains portions of a variety of course calendar models. Each description contains links (rtf and pdf, or internet) to the entire syllabus from which it was drawn.

Every syllabus in the Project Syllabus database as of Spring 2007 was reviewed by at least two reviewers. The reviewers chose portions from the following syllabi because they were both exceptional and represent a variety of ways to present the information. This document is by no means an exhaustive list of good examples of this component of the syllabus.
