WHAT IS THIS COURSE ABOUT?
Research Design & Analysis I is the first course in a two-course sequence required for Psychology majors. The second course, Research Design & Analysis II (Psy 2120) should be taken the semester after this course. The purpose of this sequence of courses is to teach you how to design, conduct, analyze, and understand scientific research, as well as to orient you to the Psychology major. General Psychology (Psy 1100) is a prerequisite for this course.

WHAT AM I SUPPOSED TO LEARN?
Below is a description of what you will be expected to learn in this course. See page 6 of this syllabus for information about how Psy 2110 contributes to your degree program.

1. Understand the basis of scientific reasoning and problem-solving.
2. Understand and apply descriptive and correlational research methods.
3. Select and interpret appropriate statistical analyses for these research methods.
4. Demonstrate the ability to use computers for statistical analysis purposes as well as for preparing written research reports.
5. Locate, read, and interpret primary source research material.
6. Understand and apply the language of the science of psychology in written research reports.
7. Consider career and graduate education alternatives for Psychology graduates.

HOW WILL I LEARN THIS?
➢ Read the textbook.
➢ Attend class and participate.
➢ Attend labs and complete lab assignments.
➢ Write and revise an APA format research report.
➢ Complete homework assignments and research activity reports.

IS THIS A HARD CLASS?
Yes. This class requires you to learn to think in a different way (scientifically) and to master a very different writing style. Some people also have a high level of anxiety about covering statistics, although the math in this class is no higher than introductory algebra. On the other hand, if you stick with it and put effort into your work, you are likely to do well. If at any time you feel that you are struggling in the course or need help with the course in any way, please come to see me. I will gladly provide whatever help you need; you are not imposing on me.
HOW WILL I BE GRADED?

Four Exams (100 points each). These exams will include conceptual parts, which will be closed-book, closed-notes, and will include multiple-choice and short answer questions. Exams 3 and 4 will also include open-book, open-note computational parts, which will measure your ability to select, compute, and interpret statistics.

Homework (20 points total). You will have 10 short homework assignments throughout the semester. These will be announced in class. On each assignment, you will earn 2 points if it is completed correctly or 1 point if you completed it but it is not correct. Although the homework is not worth a large number of points, these assignments will help you prepare for exams.

Lab Activities (50 points total). In order to earn credit for a lab activity you must be present for the entire lab and also participate in the lab. If you are late or if you leave early, you will not receive credit.

Group Participation (10 points). You will be working in a group of about three students to complete a research project. Much of this work will occur during lab times, but you will also need to work on the research outside of lab times. Each person in the group will turn in an evaluation of the group members and these evaluations will be used to determine your participation grade.

Five Research Activity Reports (4 points each). The format for these reports is available on the course website. These reports will help you get used to understanding and writing about research. You may report on any of the following research activities:

- Reading a primary source research article (reporting original, empirical research). These must be in academic journals, not popular magazines, newspapers, or websites. If you are not sure you have an acceptable article, just ask me.
- Attending a research presentation. Any opportunities to attend research presentations will be announced in class.
- Observing or participating in a research study. You may sign up at cmsu.experimenttrak.net

Research Report (100 points). This will be a written APA format report of a research project conducted with a group of students. The report will be written individually. We will cover APA format in class. The scoring rubric is available on the course website. If you do not participate in your group at a satisfactory level, you will receive a grade of zero on the report.

HOW IS MY COURSE GRADE DETERMINED?

<table>
<thead>
<tr>
<th>Points Earned</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>540 or more</td>
<td>A</td>
</tr>
<tr>
<td>480-539</td>
<td>B</td>
</tr>
<tr>
<td>420-479</td>
<td>C</td>
</tr>
<tr>
<td>360-419</td>
<td>D</td>
</tr>
<tr>
<td>below 360</td>
<td>F</td>
</tr>
</tbody>
</table>
WHAT DO I NEED TO GET AT THE BOOKSTORE?
- The required textbook, Jackson’s *Research Methods and Statistics – A Critical Thinking Approach (2nd Ed.)*. This is the same book we will use in Research Design & Analysis II.
- The CMSU Undergraduate Psychology Major Manual.
- I recommend purchasing the *Publication Manual of the American Psychological Association (5th Ed.)*.
- The packet of class notes.

WHAT ELSE DO I NEED FOR THIS CLASS?
- An inexpensive calculator with basic arithmetic functions including square root.
- I recommend purchasing a three ring binder for your notes packet and other handouts.
- You may need to purchase some inexpensive supplies for your research projects.

HOW DO I TURN IN REPORTS?
All reports must be emailed to me at kreiner@cmsu1.cmsu.edu. Save your report in Microsoft Word or in Rich Text Format (RTF), and email it to me as an attachment. The name of the file should include your first initial and last name (e.g., gspelvin.doc). Always keep at least one backup copy of your report. I must receive your report in my email account by midnight on the due date. Keep in mind that email is not always transferred instantaneously; if you send it before midnight and I receive it in my account after midnight, it is still late.

IS THERE A PENALTY FOR LATE ASSIGNMENTS?
Late homework assignments and research activity reports will not be accepted for credit. A penalty of 10% per day will be deducted for late research reports.

WHAT IF I MISS CLASS OR LAB?
You will be allowed to make up missed exams or labs if you were unable to attend due to participation in a required University activity or serious illness of yourself or an immediate family member. In either case, you should present written evidence of the reason for your absence no later than the first day you return to class and arrange to make up the work. If you do not contact me about making up the work until later, or if you are absent for some other reason, you may not be allowed to make up missed work.

WHAT BEHAVIOR IS APPROPRIATE IN CLASS?
Please be respectful and considerate toward your classmates. Distracting or disruptive behavior makes it difficult to learn. Please turn off cell phones and pagers, or put them in silent mode if you must have them on. If you might need to leave early or arrive late, please sit near the door. You are encouraged to join in class discussions, but please do not talk while I am talking or while another student is talking. Insulting, belittling, or other offensive behavior toward your classmates is not acceptable.

WHAT DO I NEED TO KNOW ABOUT ACADEMIC HONESTY?
You are responsible for understanding university regulations concerning academic honesty. Please see your CMSU Student Planner/Handbook for these regulations. Although your research project will be a group project, you are required to write your report individually. You may not copy work from other students or allow other students to copy your work. If there is anything of which you are unsure regarding academic honesty, please ask me.
RESEARCH ETHICS
We will cover research ethics in class. It is your responsibility to make sure that you understand ethical and legal requirements related to the research activities that you do. Failure to follow ethical requirements (e.g., collecting research data without prior approval from the Human Subjects Review Committee) will be treated as a violation of the academic honesty policy.

WHAT IF I NEED SPECIAL ACCOMMODATIONS?
If you have a documented disability, please contact the Office of Accessibility Services, Union 220, (660) 543-4421, to arrange accommodations.

EARLY ALERT PROGRAM
As a part of CMSU’s commitment to building a positive learning community that supports the success of every student, I participate in the CMSU Early Alert Program. That means that if I notice you are struggling with the course, I will refer you to the Early Alert Program so that they can work with you to help you have a successful experience in this course.

LIBRARY
You may access your library account, the online catalog, and electronic databases from James C. Kirkpatrick Library’s website at http://library.cmsu.edu. For research assistance, you may contact the Reference Desk:

</tbody>
</table>

I = "Introduce" "I" is used when the learning outcome is introduced, but not emphasized in the course.

D = Developed "D" is used to indicate extensive discussion, treatment and/or application of the learning outcome in the course.

A = Assessment "A" is used to indicate the students' knowledge and/or skills related to the learning outcome are measured & evaluated in the course.

R = REVIEW "R" indicates that material is just being reviewed from a previous course.
RESEARCH DESIGN & ANALYSIS GROUP PARTICIPATION REPORT

Please rate each group member including yourself on each of the three criteria. You may add additional comments on the back. Use the rating scales described below. Please try to rate as objectively as you can.

### Attendance
- **E** - attended all group meetings or made up for absences; was on time and stayed the whole time
- **F** - missed a few meetings or was not always on time and left early sometimes
- **P** - missed numerous meetings; or habitually late or left before work was completed

### Work
- **E** - did fair share or more of work; did things on time and work was high quality
- **F** - did less than fair share; did not always have work completed when agreed upon
- **P** - did very little of the work; work that was done was poor quality

### Cooperation
- **E** - worked well with other group members; provided some leadership but also let others decide
- **F** - some difficulty working with other group members
- **P** - worked poorly with other group members; negative attitude
